

Susovan Ghara

Windows Systems Engineer

susovan.ghara@icloud.com | 0421 974 038 | Melbourne, Victoria, 3000

PROFESSIONAL SUMMARY

Cloud & Infrastructure Engineer with 10 years' experience administering Windows Server environments, Active Directory, and Microsoft Azure across enterprise IT teams. Skilled in identity and access management, security monitoring and incident response, and PowerShell-based automation. Comfortable operating within mixed Windows/Linux environments and collaborating closely with development teams to keep business-critical systems secure, reliable, and well managed. Azure Administrator (AZ-104) and Azure Fundamentals certified, with a strong ITIL-based approach to service delivery.

KEY SKILLS

- Windows Server Administration & Troubleshooting
- Active Directory Management — Users, Groups, Group Policy & Access Control
- Microsoft Azure Administration (AZ-104) & Azure Active Directory / RBAC
- Security Monitoring, Incident Response & Patch Management
- PowerShell Scripting & Process Automation
- Networking Fundamentals & Infrastructure Operations
- VMware vSphere/ESXi & Hyper-V Virtualization
- ITIL 4 Service Management Processes

CAREER HISTORY

Cloud Infrastructure Engineer — TCS (Water Utility Sector)

May 2022 – Present

- Manage and secure a hybrid Windows Server and Azure environment, maintaining access controls, security protocols, and compliance standards across cloud and on-premises systems.
- Monitor system health and security events, troubleshoot complex issues, and lead incident response and remediation activities in collaboration with cross-functional teams.
- Spearheaded infrastructure upgrades and automation initiatives, delivering a 30% improvement in system uptime and operational efficiency.
- Implemented enhanced security measures that improved compliance and reduced vulnerability risk across hybrid environments.

Cloud Engineer — TCS (Energy Sector)

May 2019 – April 2022

- Planned and deployed Azure infrastructure — virtual machines, storage accounts, and virtual networks — to support business operations.
- Administered Azure Active Directory and implemented role-based access control (RBAC) and security best practices.
- Built automated monitoring and alerting solutions, improving incident response times and system reliability.
- Optimised Azure resource usage, reducing cloud costs by 20% through efficient scaling and management.

Virtualization Engineer — TCS (Energy Sector)

February 2017 – April 2019

- Managed VMware ESXi hosts, vCenter Server, and Hyper-V clusters, including provisioning, migration, and performance tuning.
- Led the build and deployment of new virtualization infrastructure from the ground up, migrating VMs between platforms with zero downtime.
- Executed regular upgrades of ESXi hosts and vCenter Server, maintaining system stability and security.

Windows Engineer — TCS (Energy Sector)

August 2015 – January 2017

- Managed and maintained Windows Server infrastructure, performing patch management, troubleshooting, and routine maintenance to ensure high availability.

- Provided technical support for server incidents and coordinated cross-functional resolution, contributing to migration from Windows Server 2008 to 2012.
- Recognised by the client for timely resolution of critical infrastructure incidents with minimal downtime.

CERTIFICATIONS

- Microsoft Certified: Azure Administrator (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- MCSA: Installation, Storage, and Compute with Windows Server 2016
- VMware Certified Professional – Data Center Virtualization 2020
- ITIL 4 Foundation

TRAININGS

- AI and Data Analytics — PL-400: Microsoft Power Platform Developer
- Digital — PL-300: Microsoft Power BI Data Analyst

EDUCATION

Bachelor of Computer Application — MAKAUT, India (2015)
